

Om Prakash Adhikari is an electrical engineer, who completed his B.E. in electrical engineering and latter M.Sc. in power system engineering from TU's Institute of Engineering (IOE), Pulchowk Campus, Nepal.

He started his professional career as an electrical design engineer and consultant in the field of low voltage power distribution & illumination and their cost estimation. Latter on he joined National College of Engineering (NCE) as a full-time faculty member and now acting as a deputy head of the department. At present besides NCE, he is continuing his work in the field of low voltage power distribution & illumination and also as a visiting faculty in various IOE, Pokhara University (PU) affiliated campuses.

As an academic career, his research interest's area lies in the field of power system stability especially stability of inverter-interfaced grid system. He had also published a conference paper in IEE, PES Nepal chapter.
